SUMMARY

Frontend Engineer focused on building scalable, accessible, and high-performance user experiences with React and JavaScript. Hands-on experience developing production-style interfaces including dashboards, workflows, and interactive experiences across 6 deployed applications, including a GenAI-style content platform (NFT World App) and a subscription-based dashboard with role-based access (Summarist App). Proficient in building reusable UI components, transforming prototypes into production-ready interfaces, and integrating frontend applications with backend APIs (REST, Firebase/Firestore, IMDb API). Recently completed advanced training in TypeScript and modern frontend architecture while continuing to operate a multi-location business generating $2M+ annual revenue. Strong foundation in computer science fundamentals, problem solving, and collaborating with product-focused stakeholders.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript (applied in Next.js App Router), HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js (App Router), Vite-React, Tailwind CSS, Node.js & Express
- **Frontend Architecture:** Reusable Component Libraries, Scalable Frontend Applications, Component-Based Architecture, Transforming Prototypes to Production Interfaces, tested using Postman
- **UI/UX Focus:** Accessible UI Components (ARIA, semantic HTML), Dashboards & Workflows, Interactive User Experiences, Responsive Design, Performance Optimization, Loading Skeletons, Carousel & Slider Patterns
- **Backend Integration:** REST APIs, Firebase Authentication, Firestore, API Data Sourcing & Dynamic Linking, Authentication-Controlled Search
- **Tools & Practices:** Git, GitHub, Vercel, Code Reviews, Software Quality Initiatives, Data Structures & Algorithms fundamentals

TECHNICAL PROJECTS

Summarist App – Subscription Dashboard & Interactive Reading Experience || React, Firebase, Tailwind CSS
GitHub || Live
Developed scalable frontend application with dashboards, workflows, and interactive UX: home page, intro carousels (Selected/Recommended/Suggested), personalized Library page, account page, and sales/subscription workflow

- Built reusable and accessible UI components: auth modal, search dropdown, sidebar navigation, skeleton loading states, and audio player controls (play/pause/seek)
- Transformed basic HTML/CSS prototype into production-ready interface with protected routing, role-based Premium access, and subscription plan management
- Integrated frontend with backend APIs and Firebase/Firestore for authentication, user library persistence, and real-time data sync; implemented authentication-controlled search and dynamic linking
- Largest independent project to date – built end-to-end without support, demonstrating architecture decisions and code quality

NFT World App – API-Driven Content Platform || Next.js App Router, Vite-React, Tailwind CSS, JavaScript
GitHub || Live

- Built production-style interface for content quality/discovery platform: served up 1000+ digital assets from multiple APIs and connected to respective pages
- Developed dashboards and interactive experiences: slider carousels displaying digital assets with individual dynamic links to detailed description pages and owner/creator profiles
- Enhanced landing page with animations and UI effects for engaging user experience

Additional Production Interfaces || React, JavaScript, Firebase, IMDb API

Live Demos

- Online Library Application: Scalable React app with reusable components, search/sort workflows, and dynamic shopping cart with personalized recommendations
- Netflix Clone: Streaming dashboard with Firebase Authentication, Firestore for user data, categorized browsing, and embedded trailers – optimized for performance
- Movies Application: Interactive dashboard using IMDb API for real-time data retrieval, keyword search, and sorting

PROFESSIONAL EXPERIENCE

Frontend Engineer Training (Self-Directed, Production-Focused) || 2023 – Present || Richmond, TX

- 2+ years intensive training building 6 production-deployed apps using JavaScript, HTML, CSS, React – aligns with React/Angular and reusable UX components requirement
- Focus on modern frontend: React, TypeScript fundamentals in Next.js App Router, Tailwind CSS, Vite, Firebase/Firestore, REST APIs, Node.js concepts
- Contribute to frontend architecture and technical design decisions; practice code reviews, performance improvements, and accessibility enhancements
- Portfolio at Vercel: MSH Projects with Git version control – GitHub: MSH Projects

Franchise Owner / Operator || 2005 – Present || Richmond, TX || Continuing Operations While Training

- Own and operate 6 high-volume franchise locations generating $2M+ annual revenue; continue full ownership while completing frontend training
- Lead 35+ employees, manage budgeting, forecasting, payroll, vendor relations, and compliance – transferable stakeholder collaboration experience

EDUCATION

- Frontend Engineering – Self-directed training in React, TypeScript, JavaScript, HTML, CSS, Node.js, Data Structures & Algorithms (2025–Present)
- QuickBooks Certification – Accounting & Payroll, Houston, TX (2016)
- Chartered Institute of Bankers (UK) – Foundations of Banking Course (circa. 1990)
- 3-years High School Diplomas (Advanced Level passes in Computer Science, Mathematics & Physics) – Hammersmith High School, London, UK (1986)
